

Sustainability Policy

Overview

Speedy are committed to the principles of sustainable growth and working with our suppliers, customers and wider stakeholders to reduce our impact on the environment and increase our positive impact in the community.

We believe that sustainability should be viewed as a driver for cost reduction and efficiency meeting commercial as well as environmental goals and by working in partnership with our customers and suppliers we can both reduce the scale of our impacts and increase the speed of progress.

Key Elements

- To assess the environmental and social impacts of all strategic decisions within the Group.
- To measure, monitor, manage and reduce the environmental impacts of our operations.
- To work with our customers and supply chain to address sustainability issues and develop a market leading 'Green' product range.
- To exchange best practice and advocate responsible business practice throughout the extended supply chain and implement a 'chain of custody' process for all our products.
- To work with our supply chain and customers to communicate sustainability awareness at site level.
- To engage our people on this agenda at both innovation and implementation stages. To champion best practice within the workplace
- To support the communities in which we operate through a range of community engagement linked to our business operations.
- To offer opportunity to disadvantaged sections of our community in collaboration with our wider stakeholders.

Speedy are following a continuous improvement policy on the environment aimed at operating a comprehensive, co-ordinated and documented environmental system which satisfies the requirements of ISO 14001:2004 across our depot network
